

Javalin

AI Center of Excellence for Oral Health

Javalin is an end-to-end utilization management (UM) and Fraud, Waste, and Abuse (FWA) solution that leverages the power of AI to dramatically improve claims review for payers.

+ Improve Decision-Making:	+ Reduce Costs:	+ Enhance Provider Performance:	+ Integrate Clearinghouses:	+ Increase Accuracy:
AI boosts accuracy, speed and consistency of clinical decision-making by analyzing every radiograph.	Streamlines the review process by automating manual tasks, enabling clinicians to focus on more complex cases.	Identifies treatment outliers so benefit companies can evaluate provider performance more objectively.	Provides a single location to access all claims review information from clearinghouses.	Detects potential fraudulent or incorrect claims, improving claims management efficiency.

Utilization Management (UM) Services

Javalin uses a combination of heuristic rules and AI-analysis to identify claims that do not meet a payer's clinical policies. AI-analysis eliminates guesswork and provides precise, objective measurements and reasons why a procedure does not meet clinical policy guidelines.

Fraud, Waste, and Abuse (FWA) Services

Combining statistical rules and AI-analysis, Javalin compares providers to their peers to identify outliers, flag concerns for further investigation or audit, and provide a depth of FWA insight not previously available to payers.

Claim Review Selection (CRS)

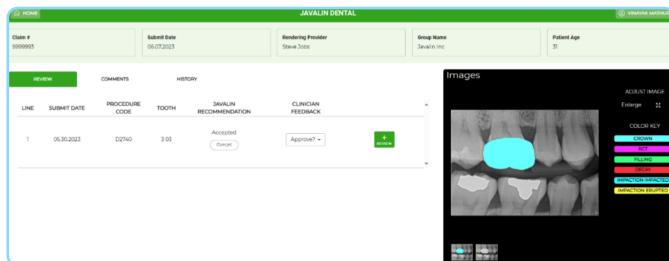

Javalin ingests all claims received and applies heuristic and statistical rules to flag which procedures require clinical review. This can be established as a pre-processing step for Javalin's AI capabilities, or a standalone service where CRS-selected claims are reviewed by payer clinicians.

AI Review Services

Javalin is an AI-forward product that incorporates AI when appropriate into UM and FWA. By utilizing multiple AI vendors, Javalin intelligently routes which claims are sent to which vendors, based on vendor expertise, to optimize automated review recommendations.

Clinical Review Portal

Javalin's Clinical Review Portal dramatically streamlines the review process by providing a single location for all claim review information - including radiographs and chart notes.

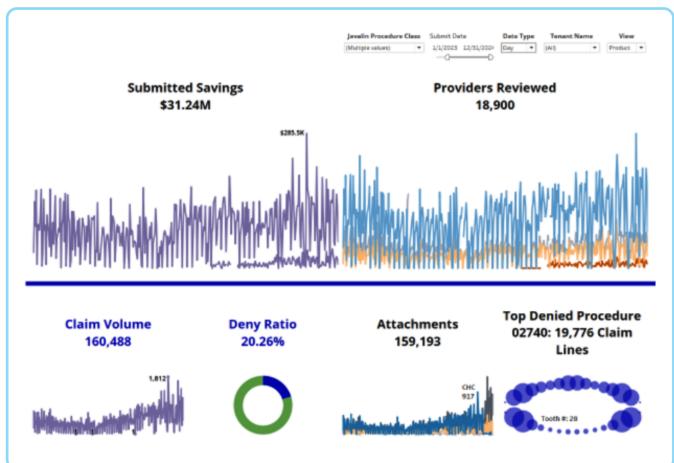

Clinician-as-a-Service (CaaS)

For payers that would like to outsource all or a portion of their state-licensed dentist clinical review, Javalin's Clinician-as-a-Service (CaaS) provides a scalable solution that delivers consistent results.

Full UM and FWA Reporting and Dashboards

Javalin provides a comprehensive UM and FWA dashboard with customized reports that offer actionable insights into real-time savings, operational performance, provider network quality, and clinical review team performance.

RESULTS FOR JAVALIN CUSTOMERS

(2022 - 2023)

\$5.3
